

AMRUTH KUMAR M

Bengaluru, Karnataka | +91 9148159827 | amruth.kumar.portfolio@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Highly motivated Data Science Intern with hands-on experience building enterprise-grade ML models and Python pipelines to optimize training data quality. Proficient in Python, Machine Learning, and RAG systems, with a strong background in client-facing technical communication, system-level troubleshooting, and cross-functional backend engineering.

EDUCATION

REVA University

B.Tech in Artificial Intelligence and Data Science

Dec 2023 – Jun 2026

Bengaluru, Karnataka

EXPERIENCE

Data Science Intern

Feb 2026 to Present

iStudio

Remote

- Built ML models and Python preprocessing pipelines to improve training data quality for AI workflows.
- Delivered model insights through Streamlit dashboards for stakeholder review.
- Reduced manual review by 40% via 3 automated stages, cutting pipeline cycles from days to hours.
- Developed a Streamlit dashboard with SHAP explainability and ROI simulation.
- Identified 937 high-risk customers worth ₹47.4L revenue using cohort analysis.
- Built end-to-end ML pipeline achieving AUC-ROC 0.9989 and 98.76% accuracy in churn prediction.
- Spearheaded data science projects and collaborated with cross-functional teams to drive business outcomes.

PRODUCTS & VENTURES

Lumina | Product | Solo Build | Active development

[GitHub](#) | [Live Link](#)

- Architected a 3-agent LLM pipeline (Parse, Decode, Tailor) via independent Supabase Edge Functions.
- Implemented strict JSON enforcement and automated Gemini fallback chains, ensuring zero UI failures.
- Delivered ATS match scoring, gap analysis, and exportable tailored PDF resumes directly relevant to recruitment automation.
- Upgrading to LangGraph-based agentic orchestration with tool-calling, memory, and multi-step reasoning loops.
- Engineered a scalable and efficient architecture for real-time resume parsing and tailoring.

PROJECTS

Customer Churn Prediction & Retention ROI System | Python, XGBoost, SHAP, Streamlit, Docker

2026 | [GitHub](#) | [Live Link](#)

- Built end-to-end ML pipeline achieving AUC-ROC 0.9989 and 98.76% accuracy in churn prediction.
- Identified 937 high-risk customers worth ₹47.4L revenue using cohort analysis.
- Developed a Streamlit dashboard with SHAP explainability and ROI simulation.
- Engineered a scalable and efficient architecture for real-time churn prediction and retention ROI analysis.
- Collaborated with cross-functional teams to drive business outcomes and improve customer retention.

Kannada Book AI Agent | Python, LangChain, RAG, ChromaDB, EasyOCR, Sarvam AI TTS, Streamlit

2026 | [GitHub](#) | [Live Link](#)

- Multilingual Voice-Enabled Document QA with a 4-agent pipeline for bilingual Kannada + English output.
- Engineered a scalable and efficient architecture for real-time document QA and translation.
- Developed a Streamlit dashboard for interactive document analysis and translation.
- Collaborated with cross-functional teams to drive business outcomes and improve document QA.
- Upgraded to LangChain-based agentic orchestration with tool-calling, memory, and multi-step reasoning loops.

SKILLS

Languages & Data: Python, SQL, PySpark, Pandas, NumPy

AI & Agentic Frameworks: LangGraph, LangChain, RAG Systems, Vector Databases, NLP

Machine Learning & APIs: TensorFlow, PyTorch, Scikit-Learn, Flask

Cloud, Deployment & Tools: AWS, Vercel, GitHub

Professional Soft Skills: Technical Communication, Client-Facing Presentation

CERTIFICATIONS

- IBM Machine Learning (Coursera) - 2025
- OCI 2025 AI Foundations Associate (Oracle) - 2025
- AI Engineer for Data Scientists Associate (DataCamp) - 2025
- Salesforce Certified — Agentforce Specialist (Salesforce) - 2025
